

Migrate to Azure with confidence

Maximise your Windows server value with a trusted Microsoft partner

Save up to
85%

over standard pay-as-you-go rates for Windows and SQL Server with Azure Hybrid Benefit

\$1B

annual investment in security

406%²

3-year ROI

45%²

fast delivery of new applications

We can help you navigate the complexities of cloud adoption, optimising your investments and reducing implementation risks to unlock the full value and security capabilities of Azure. Our services include:

- Assessing your infrastructure to understand your existing landscape
- Collaborating with you to develop a cloud adoption strategy
- Implementing and supporting your cloud adoption plan

Bring existing Windows Server and SQL Server licences to Azure

With Azure Hybrid Benefit, you can maximise your existing investments and transition to the cloud at your own pace

Save up to
40%
with Azure Hybrid Benefit

Save up to
80%
with Azure Hybrid Benefit + Reserved

Reduce risk and increase savings across cloud and hybrid environments.

Get industry-leading price performance with SQL on Windows Server on Azure

Experience up to
57%
faster performance of
SQL Server on Azure

...and costing up to
54%
less than AWS

Protect apps, data and IT workloads in Azure

Windows Server offers comprehensive security with built-in protection in Windows Server VMs and Microsoft Defender for Cloud

- 65 trillion threat signals analysed daily
- 8,500 security experts

Microsoft Defender for Cloud

Unified security management across hybrid cloud workloads

Microsoft Sentinel

AI-driven security information and Event Management (SIEM)

SQL Analytics

Unique database security monitoring for your Cloud SQL

Update Management

Automation tool to manage operating system updates

Azure Confidential Computing

Protect and secure data while it is in use

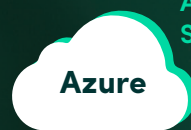

Take advantage of cloud innovations for on-premises workloads

Windows Server on Azure

Migrate to Azure VMs and modernise with Azure services such as:

Azure Automanage
App Services
Azure Kubernetes
Service

Azure Virtual
Desktop
Azure SQL

Windows Admin Centre

Manage and enable Azure Services remotely or directly from the Azure Portal including:

Backup Site Recovery
Monitoring Files
Microsoft Defender

Azure Arc

Extend Azure management and security to Windows Server instances anywhere

Organise Monitor
Govern Automate
Secure Deploy
Protect

Windows Server on premises

Use **Azure Active Directory** to provide consistent and secure identity on-premises and in the cloud

Modernise your workflow with new and improved features on Azure

- Unlock innovation with AI capabilities
- Enable secure remote work by deploying virtual desktops and apps quickly and easily with Azure Virtual Desktop
- Get continuous security assessment of your cloud resources running in Azure with Defender for Cloud
- Gain flexibility and consistency with native .NET support in App Service and Azure Kubernetes Service

Windows Server on Azure is:

Resilient

Backup and disaster recovery you can trust

48%

faster backups

80%⁵

reduction in average recovery time

Efficient

Efficiently run core applications on Azure

160k

IOPS disk storage for your most demanding workloads

Scalable

Scale applications with uncompromised performance

Create and manage up to

1,000

load-balanced VMs in minutes

Run mission critical Windows Server and SQL server apps in Azure
